2. A security professional collaborates with information technology teams to deploy an application that helps identify risks and vulnerabilities. What does this scenario describe?

1 / 1 point

☒ Installing detection software

☐ Upgrading network capacity

☐ Conducting a security audit

☐ Ethical hacking

👍 Correct

3. Which of the following entities may be an internal threat to an organization? Select three answers.

1 / 1 point

☒ Vendors

👍 Correct

☒ Trusted partners

👍 Correct

☒ Employees

👍 Correct

☐ Customers

4. An individual has their personal information stolen. They discover that someone is using that information to impersonate them and commit fraud. What does this scenario describe?

1 / 1 point

☒ Identity theft

☐ Secured customer data

☐ Network infiltration

☐ Data breach

👍 Correct

5. What are some key benefits associated with an organization meeting regulatory compliance? Select two answers.

1 / 1 point

☒ Upholding ethical obligations

👍 Correct

☒ Avoiding fines

👍 Correct

☐ Recruiting employees

☐ Increasing productivity

6. An individual is in their first job as an entry-level security professional. They apply the problem-solving proficiencies that they learned in past roles to their current security career. What does this scenario describe?

1 / 1 point

☐ Taking on-the-job training

☐ Having expertise with a specific procedure

☐ Understanding business standards

☒ Using transferable skills

👍 Correct

7. Fill in the blank: Security information and _____ management (SIEM) tools enable security professionals to identify and analyze threats, risks, and vulnerabilities.

1 / 1 point

☒ event

☐ employer

☐ enterprise

☐ emergency

👍 Correct

8. What do security professionals typically do with SIEM tools?

1 / 1 point

☐ Locate and preserve criminal evidence

☐ Identify threat actors and their locations

☐ Educate others about potential security threats, risks, and vulnerabilities

☒ Identify and analyze security threats, risks, and vulnerabilities

👍 Correct

9. Which of the following statements accurately describe personally identifiable information (PII) and sensitive personally identifiable information (SPII)? Select all that apply.

0.5 / 1 point

☐ The theft of SPII is often more damaging than the theft of PII.

☒ SPII is a type of PII that falls under stricter handling guidelines.

👍 Correct

☒ An example of SPII is someone's last name.

✖ This should not be selected

Please review [the video about the importance of cybersecurity](#).

☒ An example of PII is someone's email address.

👍 Correct
