Review Learning Objectives

1. Which of the following threats are examples of malware? Select two answers.

1 / 1 point

☒ Viruses

☒ Submit your assignment

🔄 Correct

Due Jun 4, 11:59 PM +08

Attempts 3 every 24 hours

☒ Worms

☒ Receive grade

🔄 Correct

To Pass 80% or higher

☐ Error messages

☐ Bugs

👍 Like

👎 Dislike

📄 Report an issue

2. What historical event resulted in one of the largest known thefts of sensitive data, including social security numbers and credit card numbers?

1 / 1 point

☐ LoveLetter attack

☐ Brain virus

☐ Morris worm

☒ Equifax breach

🔄 Correct

3. Fill in the blank: Social engineering is a manipulation technique that exploits _____ error to gain access to private information.

1 / 1 point

☐ coding

☐ computer

☒ human

☐ network

🔄 Correct

4. A security professional conducts internal training to teach their coworkers how to identify a social engineering attack. What types of security issues are they trying to avoid? Select all that apply.

0.75 / 1 point

☐ Overtaxing systems with too many internal emails

☐ Malicious software being deployed

☒ Employees inadvertently revealing sensitive data

🔄 Correct

☒ Phishing attacks

🔄 Correct

You didn't select all the correct answers

5. A security professional is researching compliance and the law in order to define security goals. Which domain does this scenario describe?

1 / 1 point

☐ Security architecture and engineering

☒ Security and risk management

☐ Security assessment and testing

☐ Identity and access management

🔄 Correct

6. A security professional is optimizing data security by ensuring that effective tools, systems, and processes are in place. Which domain does this scenario describe?

1 / 1 point

☐ Identity and access management

☐ Security and risk management

☒ Security architecture and engineering

☐ Communication and network security

🔄 Correct

7. Which domain involves securing digital and physical assets, as well as managing the storage, maintenance, retention, and destruction of data?

1 / 1 point

☒ Asset security

☐ Communication and network security

☐ Security assessment and testing

☐ Security operations

🔄 Correct

8. Which of the following tasks may be part of the security assessment and testing domain? Select all that apply.

1 / 1 point

☒ Conducting security audits

🔄 Correct

☒ Auditing user permissions

🔄 Correct

☒ Collecting and analyzing data

🔄 Correct

☐ Securing physical networks and wireless communications

9. Which domain involves keeping data secure by ensuring users follow established policies to control and manage physical assets?

0 / 1 point

☐ Communication and network security

☐ Security assessment and testing

☒ Security and risk management

☐ Identity and access management

❌ Incorrect

Please review [the video on security domains](#).

10. Which domain involves conducting investigations and implementing preventive measures?

1 / 1 point

☐ Asset security

☐ Security and risk management

☒ Security operations

☐ Identity and access management

🔄 Correct
