1. What is the term for software that is designed to harm devices or networks?

1 / 1 point

👍

Like

👎

Dislike

🚩

Report an issue

☐ Social application

☒ Malware

☐ Bug

☐ Error message

👍

Correct

2. What historical event used a malware attachment to steal user information and passwords?

1 / 1 point

☐ Brain virus

☒ LoveLetter attack

☐ Morris worm

☐ Equifax breach

👍

Correct

3. Fill in the blank: Social engineering is a ____ that exploits human error to gain private information, access, or valuables.

1 / 1 point

☐ business breach

☐ type of malware

☒ manipulation technique

☐ replicating virus

👍

Correct

4. A security professional conducts internal training to teach their coworkers how to identify a social engineering attack. What types of security issues are they trying to avoid? Select all that apply.

0.75 / 1 point

☒ Phishing attacks

☐ Overtaxing systems with too many internal emails

☐ Malicious software being deployed

☒ Employees inadvertently revealing sensitive data

👍

Correct

You didn't select all the correct answers

5. Which domain involves defining security goals and objectives, risk mitigation, compliance, business continuity, and the law?

1 / 1 point

☐ Security architecture and engineering

☐ Security assessment and testing

☒ Security and risk management

☐ Identity and access management

👍

Correct

6. Which domain involves optimizing data security by ensuring that effective tools, systems, and processes are in place?

1 / 1 point

☒ Security architecture and engineering

☐ Communication and network security

☐ Security and risk management

☐ Identity and access management

👍

Correct

7. Which of the following tasks may be part of the asset security domain? Select all that apply.

0.75 / 1 point

☒ Securing digital and physical assets

☐ Data storage and maintenance

☐ Ensuring users follow established policies

☒ Proper disposal of digital assets

👍

Correct

You didn't select all the correct answers

8. Which domain involves conducting, collecting, and analyzing data, as well as conducting security audits to monitor for risks, threats, and vulnerabilities?

1 / 1 point

☐ Communication and network security

☐ Identity and access management

☐ Security and risk management

☒ Security assessment and testing

👍

Correct

9. Which of the following tasks may be part of the identity and access management domain? Select all that apply.

0.75 / 1 point

☒ Setting up an employee's access keycard

☐ Conducting security control testing

☒ Ensuring users follow established policies

☐ Controlling physical assets

👍

Correct

You didn't select all the correct answers

10. A security professional receives an alert that an unknown device has connected to their organization's internal network. They follow policies and procedures to quickly stop the potential threat. Which domain does this scenario describe?

1 / 1 point

☐ Identity and access management

☐ Asset security

☒ Security operations

☐ Security and risk management

👍

Correct
