2. What historical event used a malware attachment to steal user information and passwords?

1 / 1 point

☒ LoveLetter attack

☐ Brain virus

☐ Equifax breach

☐ Morris worm

👍 Correct

3. Fill in the blank: Exploiting human error to gain access to private information is an example of _____ engineering.

1 / 1 point

☐ network

☒ social

☐ digital

☐ communication

👍 Correct

4. A security professional conducts internal training to teach their coworkers how to identify a social engineering attack. What types of security issues are they trying to avoid? Select all that apply.

1 / 1 point

☒ Employees inadvertently revealing sensitive data

👍 Correct

☐ Overtaxing systems with too many internal emails

☒ Malicious software being deployed

👍 Correct

☒ Phishing attacks

👍 Correct

5. Which of the following tasks are part of the security and risk management domain? Select all that apply.

1 / 1 point

☒ Business continuity

👍 Correct

☒ Defining security goals and objectives

👍 Correct

☒ Compliance

👍 Correct

☐ Securing physical assets

6. Which domain involves optimizing data security by ensuring that effective tools, systems, and processes are in place?

1 / 1 point

☐ Communication and network security

☐ Security and risk management

☒ Security architecture and engineering

☐ Identity and access management

👍 Correct

7. Which domain involves securing digital and physical assets, as well as managing the storage, maintenance, retention, and destruction of data?

1 / 1 point

☐ Communication and network security

☐ Security operations

☐ Security assessment and testing

☒ Asset security

👍 Correct

8. Which domain involves conducting, collecting, and analyzing data, as well as conducting security audits to monitor for risks, threats, and vulnerabilities?

1 / 1 point

☐ Security and risk management

☒ Security assessment and testing

☐ Identity and access management

☐ Communication and network security

👍 Correct

9. Which domain involves keeping data secure by ensuring users follow established policies to control and manage physical assets?

0 / 1 point

☐ Security assessment and testing

☐ Identity and access management

☐ Communication and network security

☒ Security and risk management

❌ Incorrect
