# Glossary terms from week 1

## Terms and definitions from Course 8, Week 1

**Business continuity plan (BCP):** A document that outlines the procedures to sustain business operations during and after a significant disruption

**Confidential data:** Data that often has limits on the number of people who have access to it

**Disaster recovery plan:** A plan that allows an organization's security team to outline the steps needed to minimize the impact of a security incident

**Private data:** Information that should be kept from the public

**Public data:** Data that is already accessible to the public and poses a minimal risk to the organization if viewed or shared by others

**Security mindset:** The ability to evaluate risk and constantly seek out and identify the potential or actual breach of a system, application, or data

**Sensitive data:** A type of data that includes personally identifiable information (PII), sensitive personally identifiable information (SPII), and protected health information (PHI)

**Mark as completed**
